

Lessons Learned

Feature 1: VM

- Learned how to pause clock cycles(no_op)

Lessons Learned through testing

- Learned how to use JUnit; specifically what and what not its good for being used for
 - It is only good for unit tests
 - Great for a class with lots of data modification methods
 - Not so good for something with command-line arguments and visual looks
 - This could be accomplished with a batch script
- There are tons of tools for GUI tests
- Learned how to use joints to fix dyn4j randomly breaking
