Justin 03/23/2020

So not really sure where this class will all be going let's see what confer says this week. Other then that, is there a time that will work well for yall to meet and talk once a week or so

Mary 03/23/2020

I'm available during the normal class time I don't think he'll be lecturing during the time beyond a few administrative stuff

Kiam 03/24/2020

i am only kindof available during tht time. I will be at work so I might have to step away some times

Kiam 03/29/2020

so what are we going to do for the status report today

would it be possible for everyone to get in a voice call at some point tonight to discuss wtf is going on?

Mary 03/29/2020

Yeah I could

A big focus of this cycle is all that stuff with the CAP and design documentation and testing documentation if we could establish a few tests that we want to run on the code then we can put that in our status report for tonight

Kiam 03/29/2020

That wpuld be a good idea what time wpuld wprk fpr ypu giys tnt

Mary 03/29/2020

I can do anytime after 3 today if y'all have time after as well

Kiam 03/29/2020

Can like 8-9pm work

Mary 03/29/2020

Works for me

Mary 03/29/2020

So I wrote up the status report and filled in everything but the hours, if you guys wanna take a look at it and make sure the intent for this cycle and everything else is plausible ill submit it, I just need the hours at the bottom for last week.

https://docs.google.com/document/d/18bFjKQ5va0wzTwcekuykG3w_v_XO2pGd/edit

Justin 03/29/2020

Will do

Ci'an03/29/2020

what accomplishment can we add? I feel like we haven't updated that in a while XD

nevermind I am unbelievably stupid, as im sure youve noticed by now

Justin 03/29/2020

Did my hours

Mary 03/29/2020

my plan is that we do the accomplishments for the coming week and then on the next status report Ill elaborate more on what specific tests we want to run and what design artifacts we want done

Kiam 03/29/2020

ok good idea

when is the best time for yall to talk about stuff during the week

Ci'an03/29/2020

During class

Kiam 03/29/2020

oof

Ci'an03/29/2020

Lmao, otherwise I very well may be golfing :joy::joy:

Kiam 03/29/2020

and for me ill be at work or working on y ca

car*

Mary 03/29/2020

Im available after 5pm Monday wednesday friday, otherwise yea tuesday and thursday during class time

Kiam 03/29/2020

how does everyone else feel about after 5

Ci'an03/29/2020

If I'm being honest not great really

Maybe Friday

Or if the weather is shitty on Monday or Wednesday

Kiam 03/29/2020

friday sends for me

Ci'an04/02/2020

Did you guys read confers email?

Justin 04/02/2020

Best bet

We sent him an email?

Saying we're not ready yet and ask to present a separate class time

Or sometime out of class that works for us all?

Mary 04/02/2020

Worth a shot we can try it

Justin 04/02/2020

You want to email him and cc us all?

Mary 04/02/2020

Sure thing

Ci'an04/02/2020

I mean we're doing all the work for this tomorrow any ways

Justin 04/02/2020

Yeah

Kiam 04/02/2020

wait **Mary** you went to all the sessions? cause since they were just question and answer i never went and i was worried i missed something

Mary 04/02/2020

No i just went to the two the first week and he said they were question sessions and if no one had questions then he ended the session

Kiam 04/02/2020

right thats what i figured. so what are we going to do by 2pm

Mary 04/02/2020

Im sending him an email rn explaining it to him ill cc u all hopefully he lets us do it next week

Kiam 04/02/2020

i would make sure to explain to him something like this is how our team works and he has seen that we provide good products and for that reason we didnt change anything

Mary 04/02/2020

ok how does this sound

Hello Professor Confer,

I hope this email finds you well.

Regarding today's session, my group has not yet completed the outlined tasks that will be presented on. As we were unaware of this screen sharing happening today, we had previously planned to complete the bulk of our documentation/tests this friday (4/3). However, we would like to present to you the outlined items as requested at a time next week, whether during a class session or another time that works for you. Please let us know if this is a possibility that you would accept.

Regards,--**Mary** Marji Senior CS Student | SUNY Polytechnicmarjimk@sunypoly.edu (315) 761-9622

Kiam 04/02/2020

sounds good

Justin 04/02/2020

Sounds good

Mary 04/02/2020

he responded but i dunno do we have anything to show at all

Mary 04/02/2020

Im going to email back and ask that we do it next week, unless you guys have been working on your code and want to show him today.

Justin 04/02/2020

Yeah next week works

Kiam 04/02/2020

next week is better

thats cool he is so cool abuot this

so who wants to go to todays lol

Mary 04/02/2020

ill go and see what other people present

Kiam 04/02/2020

ok

Kiam 04/02/2020

so what was class like

Mary 04/02/2020

So he wanted to see what has changed overall product wise, see what design documents we have done, and what tests are being run.

For the tests themselves, he wants the tests to be able to be repeated, like with a GUI automated toolkit if needed to playback the tests and keystrokes.

The tests should outline what should be happening and what is going wrong

Kiam 04/02/2020

ok did he talk about how to make a toolkit like that

Mary 04/02/2020

no he didnt I dont think you need a toolkit he just wants the tests to be repeatable and one person used a toolkit

Kiam 04/02/2020

ok

Kiam 04/03/2020

i can get in a voice chat from like 5 to 6 tnt while im at work then after 7

Mary 04/03/2020

I get off work around 5 so that works

Kiam 04/03/2020

ok cool

Kiam 04/03/2020

i leave work at 6 so from 6 to like 7 or 7:30 i cant be in a voice call

Mary 04/03/2020

ok do u wanna do a call at like 8 then i can do it then and now still idk about @**Kiam** and @**Justin**

Kiam 04/03/2020

8 works for me 100%

Mary 04/03/2020

ok word

Kiam 04/03/2020

@**Ci'an** ya heard

Justin 04/03/2020

Same

Mary 04/03/2020

I have my design/testing doc done and I put a template in the folder but still lost with the car movement and not using the library

Kiam 04/03/2020

i have ideas to actualy advance the code but my documentation is shit

Mary 04/06/2020

Should we upload tonight's status report sometime Monday or on Tuesday when we actually have the accomplishments done

Justin 04/06/2020

Yeah I think so, I'll write a bunch of testing stuff tmrw

I have plans for tests for all theVM stuff

Kiam 04/06/2020

oh yah **Justin** i tried to add you on snap i was gunna talk to you

idk if anyone briefed you on the meeting

but if you have ideas for tests you should talk to **Mary**   cause i think she was going to do alot of testing and we were going to write code

atleast thats what i think happened in the meeting

Justin 04/06/2020

Kk

Kiam 04/06/2020

after like 5 ish i can prolly work on some code with you **Justin**

wil you be available to get in a voice call or no?

Justin 04/06/2020

Yeah I will

Kiam 04/06/2020

ok sweet

Kiam 04/06/2020

@everyone do we all want to try and do a meeting at like 4:30 - 5 tnt?

Ci'an04/06/2020

I'll probably be busy during then

Kiam 04/06/2020

ok

Justin 04/06/2020

I can

Ci'an04/06/2020

It depends on what my dad says whe. He gets home from work

Kiam 04/06/2020

ok

Kiam 04/06/2020

Ci'an dont you have an actual whiteboard

Ci'an04/06/2020

Nope

Kiam 04/06/2020

oof

Ci'an04/06/2020

Waut

Why'd you think that?

Kiam 04/06/2020

idk i just thought i rememebred ou having one

Ci'an04/06/2020

Oh, yeah, don't have o e

Kiam 04/06/2020

ok

Ci'an04/06/2020

This is the wrong one **Kiam**

Kiam 04/06/2020

oh lmao

Ci'an04/06/2020

If want to push the time back to like 6:30 that'd be cool

If you want to just get the meeting over with and lmk that's fine too

Kiam 04/06/2020

either one is fine for me

if earlier is better for you tho **Justin** i cna still do early

Ci'an04/06/2020

Yeah I could always get in a **Kiam** whe. I get back and talk about what you guys talked about

Justin 04/06/2020

I can do whenever

Mary 04/06/2020

I get off work at 5 so if u guys wanna do like a little after 5 I can be on otherwise it's all good

Kiam 04/06/2020

ok i have some other work to do and when im done with that ill get in the call. I wanted to work with **Justin** about maybe writing some code

Kiam 04/06/2020

so did we ever remake the design documents to make him happy?

Mary 04/06/2020

he said he going to grade last cycles binder in the online meeting by tomorrow so we'll get some accurate feedback on what exactly he wants changed in the document. I changed mine little before the last presentation but not a whole lot to have everything he was mentioning to change

Kiam 04/06/2020

ok so i guess we will just describe stuff in new ones in a way that kind of makes sense

Kiam 04/06/2020

just join the voice call when yall are ready

Kiam 04/06/2020

@Mary   **@Ci'an** are you guys available to talk tnt about some tests that can be written down by tomorrow

i have to work early so i wont be able to help at all tmr before class

Mary 04/06/2020

Yeah I'll be on in a min

Or later so all 3 can be in the call **@Ci'an**

Ci'an 04/06/2020

Yeah, I'm with my family rn. 8:30 maybe?

If not, I can talk whenever or get looped in. doesn't matter to me, just whatever works

Kiam 04/06/2020

8:30 could prolly work like i said i just want to make sure we get something done for tmr and something on the status report

does the entire team have to be there tmr

Mary 04/06/2020

works for me

no just two people

Kiam 04/06/2020

ok

ill be at work so idk how consistantly ill be able to be there

Mary 04/06/2020

all good we just need someone who can explain some test we ran and any overall developments in the code

Justin 04/06/2020

I should be able to be there tmrw I think

Kiam 04/06/2020

ok so tonight we need to develop a test and im going to work on the code a bit or atleast some pseudocode

Kiam 04/06/2020

anytime yall are ready

Mary 04/06/2020

https://github.com/The60th/CS370-Cycle-One-Team-6

GitHub

Contribute to The60th/CS370-Cycle-One-Team-6 development by creating an account on GitHub.

Justin 04/06/2020

you should all be able to pull it fine

Let me know if you need push access

I just need your gthub account

Kiam 04/06/2020

also **Justin** i think i figured out our world save issue

Mary 04/06/2020

Mine is https://github.com/**Mary** m47

Ci'an 04/06/2020

https://github.com/baseballviper0404

Kiam 04/06/2020

Justin what do you know about maven

Justin 04/06/2020

Should all have perms

I know a lot of maven, its a dependency management thing

the pom.xml file is a maven file, it manages your imports and sources ect

Mary 04/06/2020

When I go to run it it says i need to edit my run configs think its something with maven

Justin 04/06/2020

project structure -> modules -> language level 8

settings -> build exeuction depoloyment -> compiler -> java compiler -> target bytecode version 8

project sturcute -> project -> project language level 8

Mary 04/06/2020

Ci'an 04/06/2020

Hey **Justin** , in the menuWIP.java, I'm getting 2 errors that say javafx.application and javafx.stage do not exist

Justin 04/06/2020

go to those files

and look at the imports at the top

clear all the imports and try and reimport

Ci'an04/07/2020

Well

No presentation today

Mary 04/07/2020

yeah im working during both the times he gave us for tomorrow so I can only be on for a bit during them

Ci'an04/07/2020

The second group time is the only time that works for me and it's only the last hour, between 4 and 5.

Kiam 04/07/2020

Wait so when are we

Ci'an04/07/2020

Justin , is there somewhere that says what each VM command does?

Kiam 04/07/2020

Ita kinda self explanitory the only ones are no_op x is to pause for x clock cycles. And jmp x jumps to x line

Ci'an04/07/2020

So are left/right turning to the left? Moving to the left? Why is it t/f? What's oneR,L,D,U

Kiam 04/07/2020

Turning left right

Mary 04/07/2020

So are two of you good for 4-5 tomorrow so I can email him back

Ci'an 04/07/2020

That's the time I'm good

Justin 04/07/2020

Yeah im good

Ci'an 04/08/2020

Here were just some of the tests that I did

Attachment file type: document

VM_Tests.docx

13.00 KB

I didn't come up with tooo much but

i feel like its more than nothing

Mary 04/08/2020

looks good

Kiam 04/08/2020

looks like I should be able to be there to talk to him

Ci'an04/08/2020

That's big good

Kiam 04/08/2020

I might have to step out unexpectedly because ill be at work

so who is going to be there

Justin 04/08/2020

Ill be there

Ci'an04/08/2020

Me

Kiam 04/08/2020

ok cool

do you guys know if **Mary** will be there as well?

Justin what were you able to get done on the vm

also i just realized we never submitted out status report so we should prolly do that tonight

Ci'an04/08/2020

She said she wouldn't be able to because she was at work

Kiam 04/08/2020

ok no problem do you guys know what she did so we can talk about it

Mary 04/08/2020

Hey guys so I put together a formal testing and design doc for the VM you can show him its in the Cycle 3 Testing folder

Justin 04/08/2020

Alright, will take a look a tthat

Kiam 04/08/2020

ok sweet

are you guys available to talk, either by voice or just in chat, about what we are going to show him? mabe around 4

Justin 04/08/2020

Yeah I can at 4

Kiam 04/08/2020

ok col

cool

Justin did you make changes to the vm? if so can you ush them? if not no problem

Justin 04/08/2020

Alright pushed it

Kiam 04/08/2020

Ok I'll take a peek in a second

Kiam 04/08/2020

im in the voice chat if you want to talk about what you did

Ci'an04/08/2020

I'm joining now

Or getting on now, I had to do something

Justin 04/08/2020

all good

just getting started

Ci'an04/08/2020

Just so you know, I keep dropping internet so sometimes I can't here him

Kiam 04/08/2020

ok

Ci'an04/08/2020

So if he directs something at me and I just don't respond or hear let him know

Kiam 04/08/2020

will do

Ci'an04/08/2020

Does anyone else have anything to say?

I'm out of things

Justin 04/08/2020

will talk about some small stuff we did

Ci'an04/08/2020

Ok

Kiam 04/08/2020

Justin do you have some time to be in the voice chat

Justin 04/08/2020

Yeah

@everyone can we have a meeting tnt at like 9?

Ci'an04/08/2020

Can we do during class tomorrow?

Mary 04/08/2020

I called in and heard a little of it, did he mention anything about design artifacts and what we need from our tests to make them

Kiam 04/08/2020

yah he talked about that in the beginning

Mary 04/08/2020

Also available at 9 tonight or during class tomorrow

Kiam 04/08/2020

ok 9tnt i def can but tmr i will only be able to like half pay attention

Kiam 04/08/2020

im here when you guys are ready

Mary 04/08/2020

@Justin @Ci'an

If you guys can input ur hours in the status report for last Sunday plz

Justin 04/08/2020

I should be on soon, if not I'll be free tomorrow during class times.

Will do that

@Mary   updated

Mary 04/08/2020

thx

Mary

 pinned

a message

 to this channel.

See all the pins.

04/08/2020

Ci'an04/08/2020

I'll try to do it now on my phone, I don't have access to my computer

Kiam 04/08/2020

ok i mean we can just meet in class time tmr if that sbetter for you

Justin isnt here either

Ci'an04/08/2020

I meant for the hours

Kiam 04/08/2020

oh ok

Kiam 04/09/2020

Hey so who is gping to class

And how were we gping to meet in thst time if someone has to go

Mary 04/09/2020

Ill be in the class

Kiam 04/09/2020

Ok let me know when you get out

Mary 04/09/2020

Will do

theres only me and one other person in there at the momeny

t

Kiam 04/09/2020

Ok

Mary 04/09/2020

Just ended he spoke a lot on the presentations and the length of them, and how we should make it clear how the tests we show in the presentations are influenced by our design decisions

Justin 04/09/2020

^ listened in on the end and heard pretty much the same

Sounds like we should try and have slides or some such that cover that pretty clearly

Kiam 04/09/2020

ok so can we talk quick about what everyone is going to do

Mary 04/09/2020

I have a template for the presentation in our drive ill start putting it togher

Justin 04/09/2020

Yeah, I'll be on in a second

Kiam 04/09/2020

bet\

Mary 04/09/2020

Yeah ill be 2 mini

Justin 04/09/2020

```
Class[] cArg = new Class[1];

cArg[0] = Long.class;

Method lMethod = c.getMethod("showLong", cArg);
```

Justin 04/09/2020

@**Kiam**   compiler.run will return 0 on success and non 0 on fail

Kiam 04/09/2020

oh rly?

so thats just a simple wait loop

cool

so i didnt really do anything but now it works so ?

ill re push

then run the world creator

just need to change the compiler output location

Justin 04/09/2020

Works as compiles + runs?

@Kiam

Kiam 04/09/2020

yah create the file, compilesa nd runs

Mary Today at 9:48 AM

If guys could put ur hours in for this weeks status report, ty

https://docs.google.com/file/d/1y-TIIpBHmw3wwR-1y2tZYQdqo6yzu0sC/edit?usp=d

Kiam Yesterday at 12:55 PM

So what's the game plan for today friends?

Justin Yesterday at 12:57 PM

Did my hours

Mary Yesterday at 12:57 PM

Im finishing up the lessons learned page and the presentation, I just need overall improvements to the VM and the Class Loader in there

Justin Yesterday at 12:58 PM

I'm pretty much finished up on the VM uniut tests

and class loader unit tests ill push those la ter today

Kiam Yesterday at 1:04 PM

ok sweet. is there a drop box for the presentation yet?

after **Ci'an** gets the track made ill set everything up so it works properly

Kiam Yesterday at 1:15 PM

also did any of you guys make a design doc for the class loader? I know i didnt so we should probably do that too cause he wants to see things based off of the design doc

Mary Yesterday at 1:17 PM

yeah theres a doc for it but it needs to be filled in with the tests and such

Kiam Yesterday at 1:17 PM

ok cool

Justin Yesterday at 1:19 PM

Want to design tests for the class loader and I can write 'em ?

Not sure if theres any really non unit tests we want

Kiam Yesterday at 1:19 PM

what kind of tests were you thinking

Justin Yesterday at 1:20 PM

For unit tests just going to have 3-4 different classes I attempt to load

Kiam Yesterday at 1:20 PM

yah i think thats kinda it

Kiam Yesterday at 2:49 PM

so i changed the world creator class so it can be used to show progress. i also added better error handing to class loader if you wanna pull

i feel like i remember his criticizing our design doc last cycle. is the VM one proper?

Mary Yesterday at 3:12 PM

We took out all of the descriptions and methods that he was critiquing last time so now its just the essential sum**Mary** , scope, tests and design decisions so I think its all set. We have to add design decisions to the VM but he never gave us graded feedback on the last one so I believe we're good

Kiam Yesterday at 3:14 PM

ok

pull the most recent stuff before you push

oops meant to pm cian

Kiam Yesterday at 4:11 PM

so how do we submit the binder stuff

also who is going to do the final video and when are we going to record that

Justin Yesterday at 4:12 PM

Yall want to do the presentation and stuff tonight?

I can do the video if need

I can both record and edit footage

Ci'an Yesterday at 4:12 PM

Hey **Justin** can you give me permission to push for the project

Kiam Yesterday at 4:12 PM

yah i mean its due tmr so i was hoping tnt lol i was more wondering like what time works for yall

Justin Yesterday at 4:13 PM

you should have it cian

check your github email

Kiam Yesterday at 4:13 PM

and **Justin** can you put the test info in the design doc for the level loader

Justin Yesterday at 4:13 PM

Will do

Mary Yesterday at 4:13 PM

Yea I can do tonight he said we could submit into wednesday morning if needed but if we can do it tonight better

We have to push all the binder stuff into a repo I beleive

Kiam Yesterday at 4:14 PM

ok and where do we submit it

Mary Yesterday at 4:15 PM

He wants the link to the git project repo with all the files posted in the discussion form on blackboard

he also wants the presentations uploaded to blackboard in the discussions

Kiam Yesterday at 4:16 PM

ok and if we def cant get it tnt we have till weds morning

cool

Ci'an Yesterday at 4:17 PM

Whenever my dad goes to bed I can get in a call and work on stuff with you guys

Kiam Yesterday at 4:18 PM

ok what time is that usually

Ci'an Yesterday at 4:26 PM

Whenever

No idea

Kiam Yesterday at 4:39 PM

ok

ok so the level loader is done. just remember when you create a track: store the .java file in gaphics/tracks and store an image in res/images WITH THE SAME NAME AS THE FILE IN TRACKS

Kiam Yesterday at 5:58 PM

can everyone type their contributions in chat so i can be sure i didnt miss anything

and would you guys be ok with meeting at like 8:30 or later?

i think im going to do something else until then

Mary Yesterday at 6:10 PM

-did VM design doc and testing, did lessons learned doc. Status reports, and did slides

I'm good for after 8:30

Kiam Yesterday at 8:48 PM

i just got back

Justin Yesterday at 9:09 PM

contributions:

Unit tests for both VM and class loader

Kiam Yesterday at 9:10 PM

Justin could you pop in the voice call for a bit to talk about what you did for tests for the class loader

also can you update **Mary** 's permission

Ci'an Today at 11:50 AM

One thing that just occurred to me, my recording the videos separately, we could all just say the same thing 10 different times and it'd look really bad

Kiam Today at 11:50 AM

no because we are only going to present whats on our slide

Ci'an Today at 11:51 AM

Yeah but you can't only do a presentation on what's on a slide, it has to overlap in to your own words.

Kiam Today at 11:53 AM

wdym

since its recorded its different

and we made the presentation pretty flowy anyaey

Ci'an Today at 11:54 AM

That doesn't manger

Matter

We could still just be saying the same thing 10 times without knowing it unintentionally

Kiam Today at 11:54 AM

if each slide is different how will that happen tho

also we can just listen to it before we submitt

Ci'an Today at 11:55 AM

Like we could just keep saying "we wanted to focus on testing" or "there wasn't many visual changes it was more testing based" or because we think someone else will say it we may just forget it

Kiam Today at 11:55 AM

but dont do tat

only say whats on the slide

Mary will say that stuff in the intro

Ci'an Today at 11:58 AM

Dude if we only say what's on the slide it'll be a 30 second terrible presentation

That just doesn't make sense

Kiam Today at 11:59 AM

im not saying only read the words. like only talk about the topic of the slide

did you get my dm we have 350 hw

Ci'an Today at 12:01 PM

Yeah but there will either be a ton of overlap or missing important information

Kiam Today at 12:01 PM

cian if we only talk about the topic of each slide there wont be a ton of overlap

and if stuff is missing **Justin** said he will suppliment

Ci'an Today at 12:02 PM

I think it's be better if we go into discord and record one at a time. That way we can say, as **Mary** said, as **Justin** said. We can build off each other's portions to help make it look better

Kiam Today at 12:03 PM

ok

Ci'an Today at 12:03 PM

If everyone else doesn't want to and doesn't really care that's fine, we can do it the original way. I just think it makes more sense to.

Kiam Today at 2:10 PM

do you guys wanna talk after class

also is someone in class

Mary Today at 2:11 PM

yeah im in class

Kiam Today at 2:11 PM

ok bet

Mary Today at 2:19 PM

He said all groups are getting the full 13% for cycle one because he took so long to grade them

Kiam Today at 2:21 PM

thats cool

Justin Today at 2:32 PM

Dope

So we are 26/26

Kiam Today at 2:32 PM

so **Justin** , **Ci'an** had a good idea. we should record the slide in front of eachother that way we can bridge off of waht other people said

Justin Today at 2:33 PM

Yeah that sounds good

Kiam Today at 2:33 PM

so are you able to get in the voice call today?

Justin Today at 2:33 PM

Yeah

Want to record at 5?

if that works good for everyone?

Kiam Today at 2:33 PM

that works, can you get the test doc finished by then?

Justin Today at 2:33 PM

Yup

Kiam Today at 2:33 PM

ok sweet

Justin Today at 2:33 PM

Is there 350 work right?

Kiam Today at 2:34 PM

yah pretty simple

Ci'an Today at 2:34 PM

yes

Justin Today at 2:34 PM

I just need to finish that up then finishing test docs

Then I'll be around

Ci'an Today at 5:33 PM

So by 5, we're we looking at 6? :joy::joy:

Kiam Today at 5:33 PM

im here whenever yall are ready

Mary Today at 5:34 PM

Same here

Justin Today at 5:36 PM

yeah 6?

I'm ready whenever

Kiam Today at 5:36 PM

well if we are all ready lets do it

Mary Today at 7:14 PM

Around 2 minutes left
